PROFESSIONAL EXPERIENCE

Digital Solutions Developer **June 2024- Present**

- Successfully delivered 5+ digital projects for local businesses in Islamabad, providing high-quality, reliable, and business-focused digital solutions. Worked closely with clients to understand their requirements, develop tailored products, and deliver solutions that improved their digital presence and business operations.

Software & Digital Solutions Intern — Altaf Developers **May 2026- Present**

- Worked on real-world digital solutions for clients, including website maintenance and optimization, client-focused digital solutions, and the design of a client appointment management system. Also managed and supported Meta Ads campaigns to help businesses improve their online presence and reach potential customers.

PROJECTS

SkillBridge — Local Services Mobile Application
Flutter • Dart • Firebase • Mobile Development
A mobile platform connecting customers with local skilled workers and service providers.

Beef Burger Patties — Restaurant Web Application
TypeScript • Responsive Web Design • UI/UX
A modern restaurant website designed to provide a professional digital presence and online customer experience.

1Tap — Cross-Device File Sharing Platform
TypeScript • Web Development • QR Codes
A lightweight platform for sharing files, text, and links between devices using room codes and QR codes.

Infinity Basket Mart — E-Commerce Website
Web Development • E-Commerce • Responsive Design
An e-commerce website developed for a local mart, providing customers with a digital shopping experience.

Text-to-Speech — Mobile Application
Flutter • Dart • Speech Technologies
A mobile application focused on converting text into speech and supporting speech-based interaction.

Cleaner — File Management Utility
TypeScript • File Management • UI Development
Developed a utility designed to identify duplicate, unused, and large files so users can efficiently clean unnecessary files from their storage.
